Application Risk Survey

Application:	Payments System			
Portfolio	Electronic Payments			

Overall Grade Risk Level Total Grade: 70 SURVEY QUESTION SURVEY ANSWER 1/1/2018 Survey Date What is the application's defined criticality of risk? LOW What is the highest sensitive information handled by this Public application? Does the application exchange data externally? Yes - Manually 10 Does the application fall under the FISMA definition? No Related to Financial transactions (\$ per txn)? Number of users for this application? Small What is the application's primary architecture? Web Application (Webshere, CF, .NET) How many systems does this application relate to/from? One to Two 10 What kind of network this application will be accessible from? Dedicated (airgapped) 0 Does the application allow remote / mobile access using a third-party infrastructure? No 0 10 How does the application receive data (users or other means)? None 0 11 Does the application generate multiple output media? Many 20 12 What is the weakest form of authentication supported by this application? Password 10 13 Does the application provide user credentials? Yes 14 End-User What is the highest role privilege available to users? Does the application use a role / rule based access control Yes Does the application support email? No 17 Does the application support file uploads /downloads? Nο 18 Does the application have security logging / monitoring controls? Yes 19 Does the application provide audit trails regarding information access? 20 Does the application utilize non-standard security controls / architecture? 21 Does the application use encryption? Yes 22

ID

CONTROL SURVEY

Payments System

#	ASKD Domain	Security Control Requirement	Applicable Policy/Standard	Response	Comments	Short Name	Applicable NIST 800-53 (Rev 4) Objective
	Authentication & Identification (AN)	Does the application leverage a company's standard authentication control for providing single-sign-on capability?	Best Practice	No		User Authentication	
1.2	racinculation (ritt)	Is multi-factor authentication as defined by the Information Security Standard				Multi-Factor Auth	
1.3		leveraged for all users this application? Is multi-factor authentication as defined by the Information Security Standard leveraged for administrative users this application?	Systems: 8.1.5 GISS Information Systems: 8.1.4	Yes		Multi-Factor Admin Auth	
1.4		Are minimum password requirements for user accounts established in	GISS Information			Password Strength	
1.5		compliance with Information Seucrity Standards? Are service account credentials stored and managed using a Privileged	Systems: 7.2 GISS Information	No		Credential Management	
1.5		Account Management solution?	Systems: 6.6.3	Yes		Credential Wallagement	
1.6		Are passwords secured using hash + salt functions using strong cryptographic algorithms?	GISS Information Systems: 7.1.13 & 13.x			Secured Passwords	
1.7		Are user accounts in the application locked out after a defined number of	Best Practice	TBD		Account Lockout	
l		failed login attempts		No		Account Lockout	
	Authorization / Access	Is the process for provisioning and deprovisioning users within the application documented?	GISS Information Systems: 6.4	V		User Provisioning	
2.2	Control (AZ)	Are users authorizations managed within a centralized tool?	Best Practice	Yes TBD		User Authorization	
2.3		Is a centralized list of all personnel with access to "SECRET" data established and maintained	GISS Information Classification: Exhibit 1: Applicability	No		Secret Data Access	
2.4		Does the application use role-based access controls and principles of least	GISS Information			RBAC	
2.5		privilege to assign user authorization? Are periodic reviews of user access rights conducted, at minimum, every six	Systems: 6.2 GISS Information	Yes		Access Audits	
		months?	Systems: 6.7 GISS Information	TBD			
	Configuration Security (CS)	Has the application been deployed on approved images or configurations and kept up to date using a patch management lifecycle?	Systems: 4 & 5	No		Patch Management	
3.2		Has a web application firewall been deployed and configured specifically for	Best Practice	Yes		WAF Implementation	
3.3		this application? Does the application employ a multi-tiered design in which the presentation	Best Practice	103		Multi-tier Application	
l		layer is isolated from other network segments? Is the application hosted on servers that are installed in a company owned	0	TBD		Design	
3.4		data center or authorized secure facility?		No		Authorized Hosting	
3.5		Is the application hosted on cloud service providers such as AWS, Azure, Google Cloud, etc.?	0	Yes		Cloud Hosted	
3.6		Is the application protected by standard Anti-DDOS solution?	Best Practice	TBD		DDOS	
4.1	Logging & Audit (LG)	Does the application log sufficient information regarding user successes and failures to reconstruct user activity?	GISS Information Systems: 10.2 & GISS			Logging	
4.3		Are application logs written to a location that is protected from unauthorized	Monitoring: 3.1 GISS Monitoring: 3.5	No		l an Managamant	
4.2		access by systems personnel or other external parties?	-	Yes		Log Management	
4.3		Is an automated log retention mechnism established to ensure the availability of log files?	GISS Information Systems: 10.3	TBD		Log Retention	
4.4		Are application events forwarded to centralized and monitored SIEM with event notifications defined?	GISS Information Systems: 10.4	No		Log Events	
4.5		Is user activity routinely reviewed to identify potential anomolous user activity				Log Activity Audits	
5.1	Request Forgery / Non-	or fraudlent use? Does the application make use of standard components for implementing	Best Practice	Yes		Request Forgery	
	Repudiation (RF)	anti-request forgery tokens?		TBD			
5.2		Do critical user actions (changing password, initiating a financial transaction, etc.) require re-authentication of the user?	Best Practice	No		ReAuthentication	
	Sensitive Data Protection (SD)	Does the application leverage encryption on all communications channels that transmit Secret, Confidential or Personal data?	GISS Information Systems: 13.1.2	Yes		Encryption in Transit	
6.2		Does the application leverage encryption to protect all Secret, Confidential or Personal data that is written to files?	GISS Information Systems: 13.1.3	TBD		File Encryption at Rest	
6.3		Does the application leverage encryption to protect all Secret, Confidential or	GISS Information	No		DB Encryption at Rest	
	Session Management (SM)	Personal data that is written to databases? Are users sessions automatically terminated after a defined period of inactivity?	Systems: 13.1.3 Best Practice	Yes		Session Inactivity	
7.2	(311)	When user sessions are terminated, does the application remove all	Best Practice			Session Termination	
		sensitive data from the screen/page or redirect the user to a new screen/page?		TBD			
7.3		Does the application make use of common libraries or components for generating and managing session identifiers?	Best Practice	No		SM Libraries	
	Validation & Encoding	Does the application make use of any Anti-Cross Site Scripting or other	Best Practice			Anti XSS	
8.2	(VE)	common input validation libraries/components? Are acceptable/expected input characteristics defined for all data elements	Best Practice	Yes		Input Validation	
8.3		received from the user or other external systems?	Best Practice	TBD			
		Is standard output encoding used on all user entered data returned to the user interface?		No		Output Encoding	
9.1	Extensible Design (XD)	Are reusable common libraries used for any typical application functionality (Authentication, Authorizataion, Logging, etc.)?	Best Practice	Yes		Common Libraries	
9.2		Is the creation of design specifications, requirements definitions and other project artifacts enforced?	Best Practice	TBD		Sec Requirements	
9.3		Have common application functions been designed according to common design quidance or reference architectures?	Best Practice	No		Secure Design	
10.1	Security Verification (SV)	Does the application undergo penetration testing on a monthly basis?	GISS Vulnerability Management: 8	Yes		Penetration Testing	
10.2		Do application development teams submit application source code for a	Best Practice			Code Review	
10.3		security review during the development lifecycle? Are Design Reviews/Threat Modeling conducted as part of the early concept	Best Practice	TBD		Threat Modeling	
10.4		phases of application development? Are infrastructure level vulnerability scans performed against the	GISS Vulnerability	No		Infrastructure Scans	
10.4		application's servers consistent with the Information Security Standard on	Management: 8			Intrastructure Scans	
10.5		Vulnerability Management? Are infrastructure level vulnerability scans performed against the	GISS Vulnerability	Yes		Infrastructure Scans	
		application's servers consistent with the Information Security Standard on Vulnerability Management?	xvxcvbcxvxcv 8	TBD			
11.1	Third-Party Management	Has a vendor security assessment been performed against the vendor of this	GISS Third-Party	100		Vendor Assessment	
	(TM)	application? Does the application's vendor provide regular security vulnerability updates	Management: 4.1b Best Practice	No			
11.2		to the organization?	DOSE FEAGURE	Yes		Vendor Security Updates	
11.3		Have vendor contracts been structured to include performance objectives and penalties for resolution of security vulnerabilities?	Best Practice	TBD		Vendor Contracts	
11.4		Has the application vendor provided attestation of security assurance	Best Practice			Vendor Attestation	
11.5		activities (vulnerability scans, penetration tests) conducted? Has the vendor signed a confidentiality agreement with Company?	GISS Third-Party	No		Vendor NDA	
			Management: 3.1	Yes
